

**CRAFCO INNOVATION**

# **EZ Patcher**

## **Master Mastic Faster**

The Crafcro EZ Patcher skid steer attachment is a completely new approach to applying mastic quickly and safely. Quick attach compatible with most skid steers, the 65-gallon EZ Patcher can efficiently apply mastic while keeping workers off the ground. In-cab integrated controls allow the operator to easily control mastic flow, application rate and material agitation. An in-cab work area camera monitoring system allows for precise mastic placement to the repair area. Engineered for ease of use, safety and reliability, the Crafcro EZ Patcher helps you get more done while keeping your crew safe. **Get more done with Crafcro.**

### **BENEFITS**

Effectively repairs longitudinal and transverse joint failures, potholes, micro-trenches, and more.

Increased production.

Safe operation.

Easy to use in-cab integrated controls.

## EZ Patcher Specifications

### Dimensions (max with drag box)

W: 96.1" x L: 44.0" x H: 48.1"  
(to top of propane tank)

### Weight (empty)

1550 lbs

### Material Capacity

65 gallons (1083 lbs)

### POWER SOURCES

#### Heater

76,000 btu propane burner (30lb propane tank on-board) with electronic ignition

#### Electrical

12VDC from skid steer

#### Hydraulic

Quick connect attachment fittings from skid steer

### INCLUDED ACCESSORIES

- 6" & 10" wide applicator boxes
- Material chute tool
- Color camera and monitor
- In-cab integrated controller for material flow and mixing
- Chute guard for Crafcro Patcher

### KEY FEATURES

- 65-gallon heated mastic applicator attachment for skid steer loaders
- In-cab material flow control
- In-cab bi-directional auger/mixer control
- Quick release drag box applicator
- Fork lift tubes for safe and easy movement of unit when not on the skid steer
- Waterproof on-board storage case for in-cab control system
- Quick release material gate for rapid emergency closing
- Dual electronic thermostat burner control system with electronic ignition
- Bi-directional application/dispensing- work from either side of the skid steer
- Anti-slip diamond steel tread plate
- Work area camera and in-cab color monitor
- Fill from Patcher II or Patcher 4 for high-volume applications
- Melts and mixes mastic blocks for low volume applications
